R+L CARRIERS

API

Integrating R+L Carriers APIs allows you to automate and customize access to our services from your own internal application or website.

Benefits

- Enable your customers to get rate quotes, track shipments and more, without leaving your domain
- Automate **Bill of Lading** (BOL) creation and shipping labels
- Receive real-time push notifications
- R+L Carriers **API** tools available through **SOAP** and **REST** standards
- Automate rates to save time and reduce the possibility of human error

API Tools Offered

- Rate Quote
- Bill of Lading (BOL)
- Pickup Request
- Shipment Tracing
- Document Retrieval
- Notifications
- Activity History
- Transit Times Calculator
- Claim Status
- Service Center Information

Application Programming Interface

API is a software intermediary that allows two applications to directly communicate with one another. API transmission methods are cross-platform and operate on a standardized protocol that does not require agreed upon transmission methods to communicate with new partners.

With APIs, freight transactions, such as requesting rates, dispatching or tracking shipments are automated. As this communication is all system to system, an incredible amount of shipment data can be processed, analyzed and acted upon without manual processes – all in real-time.
