

FREEZE PROTECTION

Freeze Protection service keeps freight from freezing by monitoring temperatures, weather forecasts and implementing special handling, such as protective packing and shipping procedures. R+L Carriers has a vast network of service centers keeping freight moving, but Freeze Protection service is extra protection for products that freeze at, or below, 32°F.

Benefits

- Internal reports identify freezable shipments passing through the R+L network
- Stay up to date with extreme weather alerts on rlc.com
- Special handling and packing of freight while in transit and over weekends using warm rooms, cargo heaters, blankets and heated trailers
- Search by ZIP code to see areas affected by extreme weather
