

R+L Carriers is a member of the SmartWay® Transport Partnership, a collaboration between the U.S. Environmental Protection Agency (EPA) and industry that advances sustainable practices in the nationwide supply chain. The Partnership currently has over 3,000 partners, including shipping, logistics, truck, rail, barge and multimodal carriers.

Reduction of nitrogen oxides (NOx) and particulate matter (PM) emissions, as well as overall fuel consumption, is a top priority of

this agreement. Since 2018, R+L Carriers has emitted fewer pollutants each year, continuing this trend into the present day. The SmartWay Transport Partnership will also help R+L Carriers set a benchmark for future goals, all while improving on the company's current sustainable infrastructure.

R+L Carriers maintains over 50,000 active assets in the company fleet. We prioritize safety, fuel efficiency, freight capacity, driver comfort and overall dependability as essential aspects of the truck line. In order to maintain safe and efficient operations, the R+L Carriers Maintenance Department manages vehicle inventory to account for assets entering or leaving company service.
